

CI 275 C Green

First name: Curtis

Last name: Green

Q1:

Improve the framework, by including new classifications that allow more easily distinguished ratings for adults 18+ and below.

Q2:

To make sure people are aware that games are for certain audiences, th current system doesnt distinguish the adults only games easily enough.

Q3:

No, all platforms of entertainment should be considered equally, ratings for movies should be equal to the ratings games, to help create a familiarity for Australians.

Q4:

No, everything should be placed in the correct category and if complaints occur, reclassification can be performed.

Q5:

Yes

Q6:

No, all content should be classified.

Q7:

Yes, if the medium needs to filtering for children.

Q8:

Yes

Q9:

No

Q10:

No

Q11:

That there is a dedicated group of people who enjoy the product.

Q12:

Education for people on the dangers of the Internet, any attempt at censorship has negative effects on the population.

Q13:

Educated parents, that are competent enough to watch their children.

Q14:

Enforce more laws about 18+ content is required.

Q15:

On the packages.

Q16:

Making sure there is the correct ratings available, including an adults only rating in all areas of entertainment.

Q17:

No

Q18:

None

Q19:

No, all areas look after themselves.

Q20:

The fact there are differences between games ratings and all other entertainment mediums. They should be equal, not different.

Q21:

There is a need for an 18+ ratings in games, to easier define games as inappropriate for children, if there is none, then kids as young as 15 can get access to content that is adults only in other countries. No merging is required.

Q22:

Have the same classifications and categorised as the other mediums.

Q23:

Yes.

Q24:

None

Q25:

No, games that are being refused are inconsistent, it is a huge joke in the entertainment industry that

we are one of the last countries to have games refused classification because of an insufficient rating system.

Q26:

Yes, same across all states.

Q27:

One of consistency.

Q28:

Yes, if it involves the fairness of classification between content.

Q29:

With consistency, not confusion.
