

CI 1094 S Gooch

First Name: Steve

Last Name: Gooch

Hello

Question 1. In this Inquiry, should the ALRC focus on developing a new framework for classification, or improving key elements of the existing framework?

I am happy if ALRC improves key elements

Why classify and regulate content?

Question 2. What should be the primary objectives of a national classification scheme?

Protect the young/vulnerable AND limit/reduce filth

What content should be classified and regulated?

Question 3. Should the technology or platform used to access content affect whether content should be classified, and, if so, why?

YES since the key issue is content not platform ie content harms not platforms

Question 4. Should some content only be required to be classified if the content has been the subject of a complaint?

NO-this is rear guard action and we need to be on the front foot
