

19. The Federal Telecommunications Act, ARPANZA, ACMA, ICNIRP Radiation Standards, EPA, Snowy Hydro Act, NBN Co Act.

Our rights have not encroached on by these Acts/Laws - they have been abolished, non-existent, decimated. They have allowed dangerous and illegal activities/behaviours to persist. They have filled our homes with deadly technology, polluted the air and water we use. They are also bordering the taxpayer with economic disaster, -

1) The Wireless Communication Grid - is an uninsulated electrical grid. It has been deployed by-passing any rigorous testing, follow up monitoring or allowing a fair complaints system. The system is illegal - it stimulates nerve/muscle tissue causing the "heat effect". The mechanism was reported to Canada Health, 2010. Continuing Medical Credits have been authorised and taught to Professionals across Canada. This (American Academy Family Physicians) from 2011 January is an experiment and no ethics committee would sanction it in their place of study.

The SAR rating on any device, is just a statement of absorption into body of radiation, - NOT safety. The TOTAL radiation is not disclosed - from tower, relay, router, antennae, - thus. ~~For~~ absorption of dangerous amounts radiation being absorbed. ARPANZAS RPS 3 - is 6 minute heating of a plastic head, cup salt water and a thermometer - mobile phone 5/8th inch away head. - No. biology, electrics - human bodies included. NOR - towers, antennae, watts, routers. included in the SAR ratings.

This is electromagnetic induction of any biological living organism. Plants, animals, pollinators, humans are being electrically induced and suffering. Undescribable damage. Ecosystem is being destroyed to quote Curtis Bennett. "Ecoicide".

Blanket radiation 900mhz - 1.8 billion^{1/3} cycles a measurable second. Human brain 8hz, wiring in walls. 50hz. nothing short. reckless. carnage. NBN has seen devices emitting dangerous levels. RF/mw radiation in homes. where people should be protected, comforted and be able to have freedom movement.

2.4ghz modems. are now common place. - people are also not being able to retain a landline thus exposing themselves. family to. RF/mw 24/7 - criminal - cell phone use 24/7.

Digital Revolution has seen industry manipulate and extort horrendous amounts. precious funding only to install high emitting RF/mw: commercial Wi-Fi. which no child or parent of that child has consented to - worse still they were not told their child would be exposed 6hrs a day, 7 days. a week = 1200 hrs a year. to a environmental pollutant that is. a 2B. poss. carcinogen (but has all criteria to be Class. 1 Carcinogen). Interrupting electro-chemical processes.

- It is a neurotoxin -
- " " genotoxin.
- " " alters blood brain barrier
- etc. " " change in white blood cells.

Children are especially vulnerable. - news system my lamination is not complete. It is criminal children are suffering due exposure, health being compromised and serious damage needs to be averted by removal of wireless. RF/MW technology from schools / hardwired - thus "precautionary principle" enacted and children's current and future rights & health maintained and respected as a mother I did not consent to my son being RF/MW exposed 23. poss. carcinogen at school. - nor do I want him "sterilized" without consent.

We have been cautioned by Australian Neurosurgeons to stop using cell phones because damage from the frequencies.

The wireless grid is also damaging buildings, causing vibration and corrosion - building engineers do not allow vibration if damages structure and leads to refusal building safety.

It is also affecting plants and food production. The cost in coming liabilities ^{- hence the economy} is unimaginable unless Gov. - reinstates our rights. our basic human rights.

The UNICEF - Rights of the Child are being disallowed, our children have had their right to health, freedom from harm, to have a family. As parents our right to protect our children from violence, ^{have} good health, has been denied.

because of these Commonwealth Laws/Acts.

Almost 20 of UNICEF rights have been breached.

These Acts/Laws are also in direct opposition to and have degraded / ^{violating} deleted many Rights outlined in the International Bill Human Rights.

Art 1 - they deny disrespect human dignity + right to freedom.

Art 2 - right to life. - unborn, born children are not being protected. from RF/MW - they are being killed, injured, harmed. from devices. inappropriately sold, marketed + distributed - mothers, parents not being informed. denied critical science / information to protect their children.

Art 3 - people are being tortured by way wireless technology. loss. comfort, ^{loss} right life, ^{loss} human treatment.

Art 4 - Electromagnetic Radiation has deprived people. right liberty. + security of person. - Emissions. EMR - has caused social isolation - Also loss privacy due collecting data, - phones, smart meters etc. loss enjoyment life, health, body + reputation.

Art 8 - loss respect private life / family life / home + loss comfort. EMR invades privacy.

Art 12 - Right marry. (EMR - shown be genotoxic.) been denied.

Art 14 - Being Discriminated and denied access to. medical care, shopping, support. from government.

The above laws are also in breach of Disabilities Act

Part B

Article 5.

8-30

(3-12-2010)

Personally I have severe Electromagnetic Hypersensitivity (microwave sickness). This occurred due to exposure to a device authorized to be sold by ACMA - it exposed me to 12,000 V/m² of microwave radiation for 3 months and subsequently nearly cost my life as I drove a hybrid car for 2 weeks before suffering horrendous seizures from absorption bismuth/cesium from cell batteries / exposure to dangerous high EMR from AC/DC batteries.

→ I have been unable to access Medical care as Medical Practitioners are not trained - I have been refused Disability based on Discrimination because Centrelink do not "acknowledge" EHS.

- I have been subject to torture/harassment in my own property/person due to Council legally in "standards" - transmitting - 2.4 / 5ghz Commercial WI-FI (RFMW) throughout my home for well over a year. (Symptoms unbearable). I have loss of use, property, liberty, privacy, (conflict) etc etc
- I experienced more Discrimination in Dec. 14. when council deployed ANOTHER commercial 2.4, 5ghz antenna behind my home. I advised them of damage/consequence; I was literally "assaulted" in my own home. 30 minutes I experienced.

- the following.

* filling blasted from tooth. ✓

* horrendous pain stomach. ✓

* " " " muscles. - legs.

face.

- neck.

- throat.

* inability to breathe.

* bleeding nose (lasted 3 weeks on exposure EMR)

* painful ear drums

* pain eyes.

* pain chest (Dr's ECG).

Further Discrimination Police refused to take a report and investigate, harassed and intimidated me to leave - no access legal recourse.

I cannot access healthcare. (EHS treatment) Disability Payment (discrimination). cannot have freedom person, movement, or body. - what I do and where I go is determined by who is emitting what EMR from what device.

All thanks to the Telecommunications Act Insurance Re Swiss SAR - deem WIRELESS - High Risk !!

* In addition the Hydro Snowy Act.

allows spraying into the air we breathe of silver oxide. (known to be an aquatic poison.) and indium sesquioxide - semiconductor and tracer. These are making people sick and unable to get medical care.

The above Comm Acts / Laws have allowed the Gov. to shift "burden of proof" onto parents, employers, and councils, principals. Must be reinstated to Gov. + co-operations.

Including liability.
It has allowed deployment of a
military-industrial complex. - ('smart grid')
that is killing, damaging, destroying.
all biological entities in its path.

The frequencies are not compatible to
humans. The electrical system is designed
to be wired. Therefore protecting many
of Human Rights, and Rights Child.
+ Rights Disabled.

Yours.

Regards

A. Lauer

These Acts have/continue to
allow —

- * causing serious bodily harm
- * seriously damages property
- * endangers a persons life.
- * creates serious risk to public and safety
- * seriously interferes with, seriously disrupts and/or destroys all human, animal & plant electronic systems.

Att:

Tina,

I apologize

disorganised submission
difficult concentrate - etc.
sending you some
extra related
material.

Paul
Lauer
