

## CI 106 J Hore

First name: Jeremy

Last name: Hore

Q1:

New Framework for Classification

Q2:

Consistency amongst all mediums.

Q3:

Content is content, and should be treated the same, be it visual, interactive or written

Q4:

Unsure. Perhaps an american style system of voluntary classification, with opportunity for review

Q5:

Impact is a difficult thing to classify, and is subjective. State the potential for impact, however it should not enter into the classification.

Q6:

No, highly marketed items may not sell well, and niche content may become mainstream.

Q7:

Defining 'Art' is not the role of government

Q8:

I dont see why not

Q9:

No

Q10:

no

Q11:

Q12:

Filtering software installed in the home, controlled by the adult owner of the computer

Q13:

filtering software installed in the home

Q14:

Requirements to view ID at purchase, hiding all but the title behind a screen

Q15:

When it is being sold or advertised.

Q16:

Govt agencies should classify, industry bodies should enforce classification, users should be consulted by government re the regulation

Q17:

Absolutely

Q18:

G and PG rated content. Anything above should still be monitored by the classification board

Q19:

Possibly a ceiling based on expected profitability?

Q20:

Since the demise of the VCR, where the information was played before movies, it may be that people are less aware of the classification system.

Q21:

R rating for video games

Q22:

The current classification markings are sufficient.

Q23:

Yes

Q24:

Any content which is illegal, such as child pornography, should be prohibited

Q25:

No

Q26:

Q27:

Q28:

Q29:
