

CI 1476 S Duncan

First name: Steven

Last name: Duncan

Q1:

Should focus on developing a new framework for classification

Q2:

To enable all forms of media to be available to those whom it was developed for.

Q3:

The technology or platform used to access content should not matter. Technology and trends change, should never stifle creativity in distribution of media simply because those in charge do not understand how it's done.

Q4:

No, content should be classified based on merit determined by a third party tribunal

Q5:

Yes. Content designed for mature individuals should be restricted to their use, much in the same way movies currently are. Children should not have access to R rated anything - be it movies or games. In the case of content on the internet however, it should be the job of parents to monitor.

Q6:

Movies, Games, etc should be classified using a system like that currently in place for movies, etc. The internet however is made up of individual contributions and should be policed by individuals.

Q7:

No. Art is art.

David is nude, kids still study him.

Q8:

Yes, but not to the extent of restriction. Warnings to consumers come to mind.

Q9:

yes

Q10:

no

Q11:

Q12:

firewalls, individual policing of personal networks. A nationwide censorship of such material can eventually be abused, and that scares me.

Q13:

Use of parental firewalls, education in computer use for both the children, but especially the parents on how to properly deny access.

Q14:

kids are kids, they'll see naked boobs in magazines no matter what we do to stop it.

Q15:

classification markings - always

warnings? - only when warranted using common sense.

Q16:

classification markings should be broad enough to cover all media.

Q17:

yes

Q18:

Games made for mature adults vs children

Q19:

Classification of mainstream popular media including games, movies, possibly music.

Q20:

yes. But game classification causes great confusion and subsequent unrest at censorship.

Q21:

yes - higher than mature rating for games

Q22:

Q23:

Q24:

nothing should be censored - not because of condoning what is being sought, but due to the fact that a blanket censorship of the internet is too easily abused.

Q25:

Q26:

yes

Q27:

Q28:

yes

Q29:
