None, if people choose to search after illegal material that's their choice

Q25:

No

Q26:

Yes, by having one system nationwide

Q27:

Commonwealth

Q28:

yes

Q29:

Add an R18+ rating for Games

Other comments:

The whole point of a classification system is to CLASSIFY, not ban. If people gain access to illegal materials, then they can go through the criminal justice system, attempting to restrict access is a useless expensive waste of time. It doesn't work for Iran, China, Libya and any other country that has ever tried it so why try it here?
