

CI 1613 A Rogers

First name: Alexander

Last name: Rogers

Q1:

A new framework but the existing framework has usable elements

Q2:

To provide a consistent Classification system that encompasses all Media

Q3:

All media should be classified how one accesses the media is irrelevant

Q4:

A reactive system is doomed to burden itself with exceptions to the rule, much better to be proactive and classify from the beginning. Besides there will always be someone who enjoys being offended complaining.

Q5:

All media should be classified.

Q6:

Not at all, fair and equal classification from someone releasing 4 copies to someone releasing 4 million

Q7:

Art should be exempt as it currently is. Warnings should be able to be attached to Exempt from Classification ratings, Adult themes etc.

Q8:

Yes

Q9:

No

Q10:

No

Q11:

Art and Education Material should remain as they are. Warnings should be able to be applied to these categories however

Q12:

Similar to Adult content now, Credit card details or other such 18+ ID. That way parents can help control content until the person becomes a legal adult

Q13:

Credit card details required for purchases and access. Appropriate proof of age similar in standards that exist for purchasing Alcohol, Cigarettes and other Adult material

Q14:

ID required at point of purchase

Q15:

All classified Material should display markings, warnings and consumer advice, Exempt from classification should just display consumer advice

Q16:

Government sets regulation and monitors for compliance, industry complies and shows compliance, users use the product and can report and breaches

Q17:

If the industry paid for a single body to classify then it would be effective with some Government supervision. If each company was left to their own devices I don't think it will work

Q18:

With supervision, Music, Movies, TV Series, and Games

Q19:

I would agree that some films are more art form than entertainment. They need to be accounted for appropriately

Q20:

M and MA cause confusion I believe. They are very similar with a 15+ rating

Q21:

Either M or MA should be removed or re-valued.

Q22:

There should be an Interactive category with sub sections for Violence Adult Themes Coarse Language etc. eg Interactive: Violence

Q23:

A big yes

Q24:

Anything that fall outside the ratings system in place for films so graphic rape child porn etc will still be banned

Q25:

Other than Games as they lack an 18+ category I think it works well

Q26:

There needs to be a little lee way with what can be allowed by a state or territory into their 18+ category but it should be subject to review

Q27:

a very similar one with better architecture to cover evolving media

Q28:

Commonwealth should have the power to set the standards, the States and territories should work within the framework set out by the Commonwealth

Q29:

Greater flexibility in covering new media. Less clunky and prone to being high-jacked by a single persons agenda
