

CI 1743 T Richard

First name: Tobin

Last name: Richard

Q1:

Key elements of the existing system should be improved to standardise across all media types. If such improvements are not possible then a new system should be developed.

Q2:

To provide a consistent source of information about content that may be used by individuals to determine if media are suitable to them or to anyone for whom they are a legal guardian .

Q3:

No, the system should be consistent across all media.

Q4:

Yes. Many forms of media can not reasonably pass through a classification process before publication. E.g. news articles, blog postings and other self published material, lists of facts, etc.

Q5:

No. All media should be covered by the same consistent set of ratings.

Q6:

No.

Q7:

Yes.

Q8:

Yes.

Q9:

No.

Q10:

No.

Q11:

Q12:

Using pliers to cut everyone's phone line. Or allow people who are concerned to install optional filtering software.

Q13:

Proper parental supervision.

Q14:

Proper parental supervision.

Q15:

When it is made available for sale.

Q16:

Government agencies should formally classify content for which a complaint has been received.

Industry bodies should self classify content before publication, if needed, and follow the guidelines for doing so to the best of their ability. Users should use classification information to determine if content

is appropriate to themselves and report content which they believe has been mis-classified by industry or government agencies.

Q17:

Yes.

Q18:

All content unless a complaint about a self classification has been received.

Q19:

Any content for which a complaint about the industry classification has been received should have its cost subsidised.

Q20:

The current rating system for computer games is confusing with many games which should be in a R category being instead in a MA15+ category. The current RC category is not well understood by the community with most people not understanding what it actually covers.

Q21:

Consistent categories across all media are required.

Q22:

The symbols used on packaging should be consistent across all media.

Q23:

Yes. A consistent set of categories should exist for all media.

Q24:

That which it is illegal to possess.

Q25:

Only content which is illegal to possess should be prohibited online.

Q26:

Yes. A consistent national classification scheme should exist.

Q27:

Q28:

Yes.

Q29:

It should be consistent across all media types.
