Q1:

Developing new framework.

Q2:

Assessing the current culture and developing new framework for it.

Q3:

Yes, some can access content easier than others e.g children cannot access pornography easily on the computer but can find it in a magazine in the bedside table. Classification should be in place to assist people in making choices, not forcing the choice.

Q13:

Develop tools to aid parents in monitoring and controlling internet usage. E.g program/s that allow certain websites to be blocked.

Q14:

Sealed and/or out of the way of restricted individuals e.g cigarettes are behind the counter in a sealed case.

Q15:

When the content exceeds a certain classification.

Q16:

Government and industry bodies need to assist people by providing information and allowing them to make a choice.

Q17:

Q18:

Q19:

Q20:

Need more categories for the higher e.g MA15+ and R18+ so that the content is more easily understood e.g violence and sex, adult themes etc are all too vague and need greater detail.

Q21:

Yes, R18+ for video games are needed. More categories for the higher levels to prevent confusion of what is in the content.

Q22:

Varying degrees of colours e.g. different shades of colours to convey the degree of classification.

Q23:

Q24:

Child pornography. All other, questionably prohibit able, should have warnings before accessing the content.
