

CI 2337 T Doro

First name:

Tim

Last name:

Doro

Q1:

I believe they should improve on the elements in the current framework namely an introduction of a r
18+ rating for video games

Q2:

to stratify content of various electronic media into easily identifiable levels of the maturity of said
content for all levels of maturity

Q3:

i believe not as all people of varying ages use all forms of technology and a good system of
classification should not be biased between technological platforms

Q4:

all content regardless of being complained or not should be classified

Q5:

all content should be classified regardless of impact

Q6:

all content should be classified regardless

Q7:

all content should be classified regardless

Q8:

all content should be classified regardless

Q9:

all content should be classified regardless

Q10:

all content should be classified regardless

Q11:

all content should be classified regardless

Q12:

via the option of each personal household being asked whether or not they would like to have a free
internet filter installed on their computers

Q13:

via the option of each personal household being asked whether or not they would like to have a free
internet filter installed on their computers

Q14:

no i believe the way they are being controlled now is sufficient

Q15:

before it is displayed

Q16:

government agencies should place content in the suitable classifications

Q17:

yes it would be very much so

Q18:

Q19:

Q20:

Q21:

R 18+ for games should be introduced and ma15+ merged with it. this allows less confusion between the M and MA15+ rating while allowing older consumers the content they want

Q22:
