CI 2361 A Bhatti

First name:
Ashvindar
Last name:
Bhatti

Q1:
Yes
Q2:
Prohibiting children from meterials that could change their values, attitudes and beliefs in a negative way whilst aloowing mature adults view said materials.
Q3:
No, the platform is irrelevent.
Q4:
no
Q5:
yes
Q6:
yes
Q7:
no
Q8:
no
Q9:
no
Q10:
yes
Q11:
representaion of cultural and social groups can play a factor in clasiffication but this would be rare.
Q12:
parental control.
Q13:
third party net filters and a watchfull eye.
Q14:
control of this content is already satisfactory.
Q15:
all meterial should be classified as it will create a clear understanding of what is within it.
Q16:
to enforce classification to ensure the safetey of children but at the same time not empede on adults rights to enjoy such material.
Q17:

yes. the current system is creating inconsistencies in rating and are sending mix messages of what is exceptible to children and what is not.

Q18:

video games.

Q19:

art

Q20:

they are understood well.

Q21:

yes we need an r18+ rating for vidoe games imply to protect children and allow acsess to adults.

Q22:

a straight forward r18 rating that is clear and precise.

Q23:

yes. but with constraint meterial should not be band but instead material should be clearly rated for adults use only.

Q24:

none. freedom of the internet is a fundemental part of being in a democracy like australia rather than communist china where the internet is filtered to constrain freedom of speach.

Q25:

no. this is a rediculouse catergorey. i have seen no examples of content that have been given the rc rating that diserved it . this rating should only be used in extremes rather than a crach for conservatives.

Q26:

yes very importaint. standard governemnt television advertisments and an internet campaign maybe.

Q27:

a simmilar model to what america uses.

Q28:

yes

Q29:

consistency is key, also the right for adults to enjoy adults material.
