ALRC

A question:

I note the following in the Discussion Paper.

“The ALRC then proposes that the following content (subject to some exemptions) must be classified before it is sold, hired, screened or distributed in Australia:

- feature-length films produced on a commercial basis;
- television programs produced on a commercial basis;
- computer games produced on a commercial basis and likely to be MA 15+ or higher;
- all media content likely to be X 18+ (ie, sexually explicit adult content); and
- all media content that may be RC.“

In theory, fine. But how is the government going to get offshore internet content providers to comply?

ALRC

The other aspect of proposing to submit websites for classification (which I raised earlier today) is that their content can change by the minute, especially those which allow for public input.

Regards

Geoff Taylor
