Q1:

Yes a new framework is required and a classification for all types of viewing for all forms of media is required.

Q2:

Create a rating system that protects the rights of individuals as well the younger generation. I am 28 years old the average of a gamer is around 30, I know the difference between right and wrong. I should be able to view and play anything that is appropriate within the boundaries of the law. We should have an R18+ system for the games category that is same across all genres including film and literature. An R18+ system will protect minors from viewing content that is deemed inappropriate for them.

Q3:

No the technology or platform should not matter. What you are viewing is either information or a visual stimulate which should be classified to focal groups.

Q4:

Nope all content should be classified as not all forms of media are appropriate for all ages.
