

CI 430 L Lamb

First name: Luke

Last name: Lamb

Q1:

Yes adding an R18 rating to games now would make sense the average age of gamers is 37, You are saying we can only play MA15 games? We should be allowed to choose our own entertainment within the boundaries of the law

Q2:

Reviewing and updating to suit modern times

Q3:

Censoring the Internet with a classification system will not work there is so many ways to circumvent it why waste the money on trying to do it instead of hiring more AFP police officers and send the offenders to jail instead of trying to sweep it under the rug and making it an underground society? Internet should be a free and open method for free speech censoring will just give other oppressive regimes an excuse to crack down even harder which HAS happened recently

Q4:

No people or lobbying groups will always complain no matter what

Q5:

Internet should remain free PARENTS SHOULD BE MONITORING CHILDRENS INTERNET it is not the governments job to do the parents job on the internet

Q6:

No

Q7:

Art should be free of classification people should be aware of what they are going to see

Q8:

No

Q9:

No

Q10:

It is already? Cinemas are already doing this and TV shows are already doing this?

Q11:

Normal media applies Internet should not it is a hub for free speech and time and time again if something has been blacklisted or censored they will slowly bring in more things to censor more etc.

We believe in free speech CENSORING IS NOT FREE SPEECH

Q12:

PARENTS DOING THEIR JOB Manual filter software

Q13:

PARENTS DOING THEIR JOB Manual filter software

Q14:

This is fine how it is you cannot purchase it without ID in newsagents

Q15:

They already do and it is clearly marked on packaging etc. Parents can make informed decisions

Q16:

Stick to what we currently use

Q17:

There needs to be a separate group similar to ICANN which has shown it can and will stand up to governments and not back down to try and suit the governments wants at the time

Q18:

Current system is alright Internet classification is not possible anyone with IT knowledge can and will bypass and I can guarantee that if you try censor the internet EVERYONE will learn very quickly how to bypass in this regard hire more AFP Police instead of trying to sweep the problem under the rug and turn it into an underground society where it will be 1000 times harder to police

Q19:

Indie films need the help they can get

Q20:

None

Q21:

No

Q22:

None

Q23:

Yes

Q24:

None

Q25:

No

Q26:

Make it federal not state

Q27:

it is almost fine how it is

Q28:

Yes

Q29:

Not Censoring the internet in any way shape or form hire more AFP Police for child pron censoring it will make it underground and 1000 times harder to track and find right now if people log onto a website it is a lot easier to track them doing it rahter than trying to catch people using VPN's running through the TOR network THIS WILL HAPPEN IF YOU CENSOR

Other comments:

Internet censorship will hurt Australia and will not help stop Child pornography in any way it will only make it harder to track.
