First name: Matthew

Last name: Parcej

Q1:

Improving key elements

Q2:

to make sure australia is in line with other countries around the world that view the same exact content we do. eg introduce ratings that we are currently missing such as R18+ for games which every other country has but australia, adults should be allowed to play whatever game they want instead of it all being banned by default.

Other comments:

you can still protect the kids from violent games even if you introduce an R18 rating for games, introduce fines and punishments for any retailer that doesn't follow the classification laws, make it very hard for kids to buy MA15 games and make the parents responsible for buying unsuitable games for their kids, call it neglect or abuse or just carelessness but most parents blindly buy what their kids ask for even if the game is completely unsuitable for their kids, introduce a punishment to deter parents from buying games,

thanks
