Just make an R18+ rating so mutilating good games we like can STOP just because it doesn't suit some sheltered and over protective pen pushers!

Other comments:

Leave our games alone put a R18+ rating on and stop mutilating our games I'm 27 yrs old I don't need a nanny country telling me I can't play a game or can't get it in because a bunch of pen pushing non gamers put a beurocratic stupid censorship rating on it banning it from even entering I'm sick and tired of this country telling gamers what they can and can't play, this country can try and stop young kids from playing all it likes but in reality it's up to the parents in the end not this system, this system

has NO right telling people what game we can and can't play or certain games need to be toned down! NO they don't leave them alone stop mutilating them if CERTAIN people don't like the game simple don't play, don't buy, I don't care, just stop restricting and destroying our gaming rights for a couple how evermany people who again have no right telling us gamers what we can and can't play just because it's too much for them!
