

CI 748 L Rigney

First name: laird jamie

Last name: rigney

Q1:

i think personaly they should improve key elements of the existing framework i think we should have an 18+R rateing on games

Q2:

to clarify and resolve the issue of a R rateing on games it's been going on too long with decisions made then indecision then debates all aparently to come to the same decision /conclusion all the time we as older gamers need this resolved so it opens up more games for us here in australia

Q3:

personaly you can put a label on something say MA 15 + and the contents PG the same goes for games what your banning as adult content might not be that bad and people play games knowing full well thier playing a game if it's voilence or blood i ask you this whats more violent a simular classed video/dvd or game children watch these movies all the time ask any parent doe's thier kids watch there movies with them bet the answers yes

Q4:

kids are the greatest mimicks thier learning everyday to fit into sociaty lets face it some people have nothing better to do than complain about trivial things in a mundane way it makes them happy or they use it as an excuse for thier own short comming ie a carpenter blames his tools for doing a shitty job it's not the tools that are to blame it's a shoddy carpenter

Q5:

all we're asking for is a R rateing so as adults we can enjoy more games the rateings you have now are fine they do thier job but as adults we need to be able to play adult games instead of kids and teenager games

Q6:

seriously give the R rateing a trial say for a year and i bet you at the end of that year you'll keep it because if it's potential money your worried about it's a decision that will be a win win one

Q7:

lets look at life and sastictics and so forth kids as old as 10 know what sex is kids as old as 11 are bashing people why because of thier parents and what they watch on tv and dvds and seriously with the net they get on porn sites you tube facebook ect ect

Q8:

it's a bit stupid

Q9:

personaly all i'm asking you for is an R rateing on games and like minded people like myself so we as adults can play more games and more chioce open for ourselves

Q10:

seriously go home ask your kids and they'll properly know more about stuff than you or i my point is you ban games for explicit material can't decide whether or not to give us an R rateing when kids can

hop onto a computer get thier older brother or mum and dad and watch something more violent or more pornographic than an adult video game

Q11:

think of us older gamers please we have the maturity to handle the content slap the R18+ on them

Q12:

you won't stop kids getting something they want so if say a parent was going to buy an R rated game for his child then i'd say the parent made a decision to give the content to a child don't punish everyone because of others bad decisions

Q13:

the system of the internet is controlled now with access denied to children but if a child can use a computer they can access thier parents files if they use passwords correct and all they have to do is access the history and were ever the parents been it's all open to them so if the mum or dad sits on porn sites thier open to thier children like the carpenter metaphore you can't blame the tools

Q14:

well most stuff doesn't work offline and the same as above if the parents leave it open for thier children to find it's thier fault

Q15:

it does now everythings got a classified label from toys to tv shows

Q16:

to use commensense and not be biased in thier decissions like i said before most gamers are mature like everything thiers a few d/heads who spoil it for the responsible ones

Q17:

well we don't have an R rated system on games and the games are being banned because of content so yes i think you should work out a system so that adult gamers have more choice and freedom to enjoy games

Q18:

as above the R rating for games it's really a straight forward decision children can't buy hire ma15+ or R18+ dvds or see it at movies so they won't be able to buy R18+ games

Q19:

i honestly don't know

Q20:

yes there clear and straight forward

Q21:

yes the R rating for video games should be made

Q22:

by making it all universal one classification for all media

Q23:

yes make it universal through all media

Q24:

hard to say

Q25:

no the R rating for video games is for adult gamers a bit unfamiliar we have the maturity to handle the content

Q26:

well were one nation australia so yes it should be universal through all states which i thought it was already

Q27:

can't say i really don't know

Q28:

all i'd like is an R rating for video games so i can enjoy a better choice in games because the current system is lacking

Q29:

give us the R rating for video games please

Other comments:

i really feel we should have the R rating for video games as an adult gamer we have limited choices for our money we're a bit backwards in this issue from the rest of the world they have it and it seems to work so i think as aussies we stood up and took our place in the world .

thankyou for letting me put my view forward and i hope you give us the R rating .

many thanks

laird jamie rigney
