

CI 776 A Black

First name: Alexandra

Last name: Black

Q1:

I'd like to see the ALRC creating a new classification scheme which involves a more diverse rating system. One that allows those of age to view content easily and requires photo ID for such products, and fines those who provide such products to people under age.

Q2:

Allowing people of appropriate age to be able to watch or play whatever they want and not allowing those underage to do so.

Q3:

No, I don't believe so.

Q4:

Q5:

No, I think that content should just be rated due to the actual content. I believe that there can be far too much confusion if you try to throw in classifications for impact.

Q6:

I believe that everything should be classified, aside from the news and art, regardless of how many people may have access to it.

Q7:

Provide consumer advice only.

Q8:

Yes

Q9:

No

Q10:

No

Q11:

None that I can think of.

Q12:

Photo ID or birth certificate number checks maybe? Not sure.

Q13:

See above.

Q14:

Photo ID required for purchase.

Q15:

Always?

Q16:

Unsure.

Q17:

Q18:

None

Q19:

Always

Q20:

M caused confusion in my household, because my family thought it meant you weren't allowed to watch M until you were 15, not that it was a choice.

Q21:

I like them how they are at present :)

Q22:

I believe it would be a lot more consistent if people weren't trying to judge what sort of impact something would have on a person, rather than just providing classifications for the actual content.

Q23:

Yes

Q24:

None. Other than child porn, of course..

Q25:

No, I am all for BDSM and that stuff being permitted online, so long as the appropriate age classifications are applied.

Q26:

I believe that classifications should be the same worldwide.

Q27:

Um.. Not a clue. Sorry :)

Q28:

Same as above.

Q29:

None.

Other comments:

If you try to apply a complete internet filter, people will just use proxies and eventually find a quick and safe way to get around it permanently. Don't try to be China, Australia is meant to be a free country, keep it that way.
