

CI 784 R Short

First name: Roger

Last name: Short

Q1:

Improve key aspects of existing framework.

Q2:

Introduce R18+ category for computer games. Introduce R18+ and X rating for all content and platforms. Remove RC.

Q3:

Yes, because it would be impossible to classify every computer game, or mobile phone app (just like magazines or books)

Q4:

Yes. As per Q3 - as long as there is appropriate R18+ for computer games and X rated guidelines for online content).

Q5:

No. No.

Q6:

No

Q7:

Yes. But not RC.

Q8:

Yes.

Q9:

No

Q10:

No. The classification system serves as a guideline for consumers - not as censorship

Q11:

Q12:

None. There is no effective method. Do not attempt to control or classify online content.

Q13:

Education and parent supervision. There is no effective way of automating this.

Q14:

By introducing an X rating

Q15:

When it is displayed on free to air TV or at point of sale

Q16:

Co-regulatory model. Cooperation

Q17:

Yes.

Q18:

All content should be industry classified.

Q19:

none

Q20:

A lack of R18+ for video games causes confusion from consumers. In addition; RC causes confusion. People think because an item is RC it is illegal.

Q21:

Yes. Introduce R18+ and X rating for ALL content and platforms. Remove Refused Classification (RC).

Q22:

Ensure there is an R18+ and X rated category for video games to bring it into line with all other forms of media. Remove Refused Classification (RC)

Q23:

Yes

Q24:

none. No content should be prohibited online.

Q25:

Yes, because there is no government enforced online censorship. ISP/industry level voluntary programs are ok.

Q26:

Yes.

Q27:

A federal system. Without internet censorship.

Q28:

Yes.

Q29:

1) Introduce an R18+ category for computer games. 2) ban censorship of the internet.

Other comments:

Introduce R18+ and X rating for ALL media and content and platforms (including computer games).

Remove RC from all content and platforms.

Do not introduce classification of online content. Do not censor online content.

The classification system serves as a guideline for consumers - not as censorship (it is a servant not a master).
