Subject: Antidiscrimination laws

I note that your recommendation to the government is to remove the current exemptions enjoyed by private schools.

These institutions have been established and developed over several generations . Their purpose has been to give young people a full and complete learning experience. They are unique and were developed in a free and democratic society. Their purpose is to maintain these values.

I regard the proposed removal of their current rights as a form of discrimination against these institutions (and I thought that your proposals were to remove discrimination !!)

Your's
Robert Packer
