Q4
How much should surro child know
I believe a child born through surrogacy should know everything at age appropriate times and it should be an open conversation with the child

Q5
Barriers to domestic surrogacy would be the lack of awareness of legality, low number of people willing to do surrogacy for people not already known to them and in turn having to find someone who would be willing

Q6
Eligibility requirements for surrogacy should be the same as it is now

Q8
No, I think the requirements are where they should be

Q9
I think agreements should be enforceable both ways, how to enforce it I am not sure of

Q10
I think there should be post surrogacy counselling available for all involved as part of the requirements

Q14
I think medicare should be available for people going through surrogacy, it would have been used by them for their own pregnancies if they were possible and we still pay the taxes and levy for it all

Q16
I support a compensated form of surrogacy

Q19
I think it should be automatic recognition of intended parents as parents if there is a surrogacy agreement in place

Q25
Awareness and education is severely lacking, when I speak to people about surrogacy, a common response is “is that legal here”, I didn’t really know a lot about it until we needed to start looking at it as an option.
Our GP is intrigued with our journey of surrogacy and has asked us to keep her informed of our journey so that she knows what actually happens.

Thank you for your time
