

Surrogacy Submission: RTLukins.

Précis: humans are not for sale, babies are fully human, surrogacy is immoral.

There is NO situation in our world where “paid reproduction” can ever be justified as anything more than an immoral convenience- whereby females are paid to reproduce for someone else BUT then have their baby removed from them AND where a child will never have mother or father contact- with little care for medical risk (to themselves OR baby) or future medical needs of either.

A commodity adequately describes what surrogacy is- “I want and will pay to get”! This might be OK for potatoes or cars BUT NEVER for a human life: made in God’s image, for His glory! Some values in this life aren’t ones that can be compromised and human life is one such value.

Morality is about right and wrong, good and bad. Values are the right and the good choices, supporting chosen morality standards. Humans and human life is sacrosanct- not negotiable, not trade-able, NOT a commodity! Free Will / choice without coercion is key.

Note: forced child reproduction is equally immoral and terrible to mothers and their children to paid surrogacy.

Thankyou.
